

Why go to lipreading classes?

I had already received a hearing aid but felt I wanted to do more to help myself cope with my hearing loss.

As my hearing loss has got worse, I've found myself sometimes not picking up part of some conversations.

I was ready to try anything to make communication easier.

The word 'pardon'!

I asked the question: what have I got to lose? If it's not for me, I'll stop going. If it is for me, I'll have gained.

I felt it was absolutely necessary as I realised I was in fact already lipreading in order to communicate.

To better understand what people are saying.
